About Wright Engineering

Services

From designing green building mechanical and electrical systems, to designing state of the art voice/data/video and special systems, the work we do combines a high level of expertise with a quick response and excellent client service.

We believe that engineering services should focus on providing the highest quality end product which is custom tailored to each clients budget and time limitations.

From conceptual design, to systems commissioning, we provide the expertise to produce the most appropriate cost-effective design.

Professional Engineer Licensing

We have Professional Engineer Licenses in:
**Maryland, Delaware, Pennsylvania,
Virginia, District of Columbia**

Qualifications

Our qualifications enable us to participate in a variety of projects involving residential, commercial, industrial and institutional buildings.

With over twenty years of professional design and consulting engineering experience, we have the technical capability needed to provide the highest quality and the most innovative solutions for our client's needs.

James W. Wright, P.E.
Principal

A Woman Owned Business
